

CAFM Explorer Case Study

Another World icon chooses CAFM Explorer

The Atlantis Palm in Dubai

When it comes to iconic buildings around the world none is probably more widely known than The Atlantis Palm in Dubai.

Similarly CAFM Explorer has become renowned for managing many of these prestigious facilities around the world. CAFM Explorer has now been established in over 43 countries from London to Australia and it's not surprising that the largest growth area is the Middle East with hundreds of millions of sq ft of property already being efficiently managed.

The Microsoft GOLD partnered product has become a favourite choice of property and facility professionals everywhere.

"CAFM Explorer has now been established in over 43 countries from London to Australia"

Atlantis Palm is the largest water themed attraction in the Middle East sited in 46 hectares and with 17 impressive hectares of water themed amusement. It's the flagship resort on the acclaimed Palm Jumeriah and a serious facility to manage efficiently. Created by Kerzner International Holdings Limited, Atlantis Palm was the first resort to open its doors on Dubai's revolutionary island.

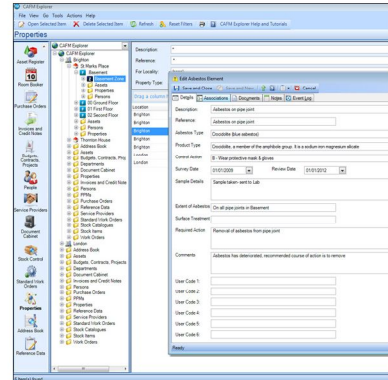

Crown House Technologies who have responsibilities for a number of contracts within the facility, were impressed with CAFM Explorer's capability and affordability. Their primary concern was the management of staff accommodation which consists of over 2,400 apartments.

The Facility Manager from Crown House Technologies said CAFM Explorer stood head and shoulders above the competition and we knew

The Property Management App

from the feedback we had from other CAFM Explorer systems in the area that it was a class product. It's incredible value for money and we can see why it's a Microsoft GOLD partnered solution.

CAFM Explorer has been deployed at the Atlantis Palm site to address reactive calls on the Help Desk and all planned maintenance.

Tony Leppard Managing Director of FMx who is the author of CAFM Explorer expressed his delight that CAFM Explorer was being used in such a visible location in Dubai. We are now installing more systems in the UAE than another other country outside of the UK claimed Tony. We are proud to see CAFM Explorer dominating the UAE and such iconic landmarks as Atlantis Palm.

"We are now installing more systems in the UAE than another other country outside of the UK"
